Art Unit: 3723

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhaoyouyi (CN1227780) in view of Halls (3901107).

Zhaoyouyi discloses all of the claimed subject matter except for having a traction mechanism connected to the shaft to drive the second gear. Halls discloses a traction mechanism connected to the shaft to drive the second gear. It would have been obvious to one having ordinary skill in the art to form the drive mechanism of Zhaoyouyi as a traction mechanism as such would have been an obvious mechanical equivalent to allow for a gear to be driven and to quickly adjust the jaw as taught by Halls.

The examiner takes Office Notice that the use of "rope" for a drive is notoriously old and well known in the art of drive mechanisms. For example, rope may be used to lift an elevator as opposed to using a belt or chain drive. Consequently, it would have been obvious to one having ordinary skill in the art to form the belt or chain of Zhaoyouyi as modified by Halls as a rope as such is a well known equivalent.

3. Claims 2 and 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
